The Profit Proven group represents generations of family owned ranching operations. These commercial cow-calf producers also represents generations of Gardiner Angus Ranch genetics throughout their cow herds.

The Profit Proven members are early adapters of using data such as EPDs, artificial insemination and genomic technology as a benchmark for selecting replacements and managing risk in a retained ownership environment. Similar focus on health, nutrition and temperament make this offering an unprecedented opportunity for anyone seeking to make genetic improvement in their present cow-calf operation. ***Buy with confidence!***
